## SUMMARY

---

I'm a full-stack developer with 3 years of experience in building apps from ground up. Having worked mostly in startups, I'm accustomed to wearing many hats. I specialize in building impactful, scalable systems.

## SKILLS

---

**Languages:** JavaScript, TypeScript, Go

**Frontend:** React, Next.js, Tailwind CSS, Redux, Zustand, TanStack Query

**Backend:** Node.js, Express, NestJS, PostgreSQL, MongoDB, Redis, GraphQL, Microservices

**Tools:** Jest, Cypress, Git, GitHub Actions, CircleCI, Docker, AWS, Vercel, Turborepo

## WORK EXPERIENCE

---

### Vericy AI

Frontend Engineer

**Bridgewater, NJ**

Nov 2023 - Present

- Led the architecture and implementation of a Turborepo monorepo, consolidating 7+ projects, centralizing shared packages, reducing deployment time by 40% and accelerating feature development by 60%.
- Migrated legacy apps to Next.js + TypeScript, improving speed, SEO, and maintainability, using smart caching strategies and optimized rendering, while cutting bugs by over 50% using Jest and Cypress tests.
- Engineered Go and Bash CLI tools to automate package scaffolding, accelerating dev workflows.
- Developed scalable REST APIs using NestJS and PostgreSQL to streamline backend processes.
- Implemented CI/CD pipelines across multiple projects by using Github Actions, Vercel, Docker and AWS, integrating testing and automated deployments, speeding up integration and release cycles.
- Built data-driven B2B and B2C dashboards with optimized state management, for fast performance.

### Intellicure Healthcare

Fullstack Engineer

**Salcete, Goa, India**

Aug 2022 - Nov 2023

- Built a full-stack appointment scheduling system with React, Node.js, and PostgreSQL, including an admin dashboard, automated reminders, and patient management for multiple Medicare Centers.
- Redesigned and migrated 12+ legacy apps from PHP to React.js and Next.js, enhancing performance, SEO, and user engagement.
- Contributed to the development of a custom medical e-learning course platform, replacing Teachable, cutting third-party costs by 90%, and improving content streaming, uptime, and user experience.
- Set up CI/CD pipelines with GitHub Actions, automating deployments and reducing manual effort across React and Node.js projects.

## EDUCATION

---

### Rosary College of Commerce and Arts

Bachelor of Computer Applications (Jun 2019 - April 2022)

**Navelim, Goa, India**

CGPA 8.5/10

## PROJECTS

---

### Polonium - API Testing Tool

*Tech Stack:* Next.js, Tailwind CSS, Zustand, HTTP, WebSockets

- Built a tool to test REST and WebSocket endpoints, allowing customizable requests and responses with headers, cookies, and various data formats.
- Added functionality for creating collections with nested folders to organize API requests efficiently.
